

INVESTOR PRESENTATION

THE DAWN OF THE RESOURCE REVOLUTION

THE CHALLENGE:

3 billion more middle-class consumers expected to be in the global economy by 2030

Up to **\$1.1 trillion** spent annually on resource subsidies

THE OPPORTUNITY:

\$2.9 trillion of savings in 2030 from capturing the resource productivity potential

At least \$1 trillion more investment in the resource system needed each year to meet future resource demands

THE WORLD POPULATION AND STANDARD OF LIVING IS INCREASING DRAMATICALLY

WORLD RESOURCES ARE UNDER UNPRECEDENTED PRESSURE

RESOURCE PRODUCTIVITY MUST INCREASE TO ENSURE SUSTAINABLE DEVELOPMENT

TOMRA creates sensor-based solutions for optimal resource productivity

OUR BIGGEST GLOBAL CHALLENGES ARE ALSO BUSINESS OPPORTUNITIES

TOMRA: POSITIONED TOWARDS MEGATRENDS

FROM PURPOSE INTO PROFITS AND
PROFITS INTO PROGRESS, TOMRA IS
TRANSFORMING WHAT IT MEANS
TO BE RESOURCEFUL.

- Our solutions, in use around the globe, helped keep **~25 millions of tons of CO₂** from being released into the atmosphere in 2017
- **~35 bn used beverage containers are captured every year** through our reverse vending machines
- Our steam peelers process **~15 million tons of potatoes per year with a 1% yield improvement** over other alternatives
- **~715,000 tons of metal are recovered** every year by our metal-recycling machines

LEADING THE RESOURCE REVOLUTION

TOMRA IN SHORT

CREATING VALUE THROUGH TWO STRONG BUSINESS AREAS*

TOMRA
SORTING SOLUTIONS

- High growth
- High margins
- Medium cyclical

TOMRA
COLLECTION SOLUTIONS

- Stable
- High margins
- Low cyclical

High technology - sustainable business

THE TOMRA TRANSFORMATION JOURNEY

TOMRA WORLDWIDE

TOMRA'S TWO BUSINESS AREAS

TOMRA'S CR PROGRAMME 2016 – 2020

8 DECENT WORK AND ECONOMIC GROWTH

Decent work and economic growth – SDG 8

TOMRA will promote sustained, inclusive and sustainable economic growth and decent work for all

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Industry, Innovation and infrastructure - SDG 9

TOMRA will contribute to building infrastructure by supporting sustainable use of natural resources and fostering sustainable innovation in the industry

11 SUSTAINABLE CITIES AND COMMUNITIES

Sustainable cities and communities – SDG 11

TOMRA will contribute to making cities and communities more sustainable by delivering sorting and recycling solutions that ensure safe handling of waste and other material streams

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Responsible consumption and production – SDG 12

TOMRA will contribute to ensuring sustainable consumption and production patterns

TOMRA IN DEPTH

TOMRA Collection Solutions

**RETURNS
INTO
VALUE**

ONLY 2% OF THE ANNUAL PLASTIC PRODUCTION IS REUSED FOR SAME/SIMILAR PURPOSE APPLICATION

THE BEVERAGE PACKAGING MARKET CONTINUES TO GROW

In 2015 the Global beverage packaging mix counted ~1.6 trillion units (3% growth vs. 2014)

TOMRA collect approximately 35bn containers annually - this represents only 2.2% of all beverage containers

*Cartons, pouches, sachets etc. Source: REXAM Annual report 2015

REVERSE VENDING ADVANTAGES

CURRENT DEPOSIT MARKETS*

* In addition, TOMRA has some activity in markets with refillable deposit systems like: Austria, Belgium, Chile, Czech Republic, France, Hungary, Poland and South Korea

THE USED BEVERAGE CONTAINER RECYCLING VALUE CHAIN

Generic used beverage container (UBC) recycling value chain

RVM-based UBC recycling value chain

RECYCLING OF BEVERAGE PACKAGING IN A DEPOSIT SYSTEM

ELEMENTS OF A MODERN REVERSE VENDING SYSTEM

User communication

Data administration

T-9: THE FIRST OF A NEW GENERATION OF MACHINES

- In fourth quarter 2013, TOMRA presented the first machine of the **new generation** of machines to come
- T-9 features the first **360 degree recognition** system applied in an RVM and a completely new industrial design
- The machine is **faster, cleaner** and **takes all** types of beverage containers
- **The launch was successful**
 - Large number of machines installed in core markets
 - Key product for replacement sale in e.g. Germany

A COMPLETE TRANSFORMATION OF THE PRODUCT PORTFOLIO

2012 Portfolio

2017 Portfolio: Flow technology

WIDE RANGE OF SOLUTIONS SUITABLE FOR DIFFERENT TYPES OF MARKETS AND APPLICATIONS

To set up an **optimal reverse vending system**, a number of factors need to be taken into consideration:

- Weekly container return **volume** and container **mix**

- **Logistics/bin handling**

- Available **space**

TOMRA offers a complete solution ranging from the smallest store to the industrial segment

PORTFOLIO OVERVIEW: CONTINUED EXPANSION INTO HIGH VOLUME BULK COLLECTION

COMPETITIVE LANDSCAPE

● Annual revenue from RVM sales

Source: TOMRA estimates and analysis

THE SOURCING STRATEGY IS AN ENABLER FOR CONTINUED COST CONTROL

COGS distribution by region (sourcing)

Percent of total

Phase 2 – Standardisation & localisation

- Standardisation and cost optimising product portfolio
- Economies of scale, automation/robotisation and efficiency in supply chain and production
- China localised product development and product portfolio

Cost effective product design, optimized supply chain and China localised product development will enable cost control

Source: TOMRA analysis

CREATING NEW REVENUE STREAMS FROM SW/IT

TOMRAPlus

TOMRA ReAct/PANTO

IN-STORE MARKETING

Transform reverse vending machines into customer dialogue tools.

RECEIPT CONTROL

Validate and devalue deposit refund receipts in real-time through POS.

RVM INSIGHT & ANALYSIS

Operational metrics, performance monitoring, fleet management, business intelligence and analysis.

CONSUMER ENGAGEMENT

Innovative solutions for customer loyalty and engagement with customer identification.

Integrating hardware and software into attractive and engaging combos

GERMANY REPLACEMENT UPDATE

NEW SOUTH WALES CONCEPT ILLUSTRATION: MATERIAL FLOW

The JV will operate the **Collection & Counting Center** as well as the **Commodity Trading** together

Cleanaway brings the experience in logistics, material handling, commodity exposure and trading

POTENTIAL NEW DEPOSIT MARKETS

COLLECTION SOLUTIONS – FINANCIAL DASHBOARD

TARGETS 2013 -2018

Yearly growth 4 – 8%

EBITA-margin 18% – 23%

TOMRA Sorting Solutions

**WASTE
INTO
VALUE**

STRONG REVENUE GROWTH SINCE INCEPTION IN 1996

Revenue development and key milestones MNOK

- Total revenue growth (organic plus inorganic) CAGR of ~30% per year from 2004-2017
 - Average annual organic growth for the same period was ~17%
- Technology base and segment/application knowledge expanded both through acquisitions and in-house ventures

SORTING VALUE PROPOSITION

HOW DOES SENSOR BASED SEPARATION WORK?

- High-tech sensors to **identify objects**
- **High speed processing** of information (material, shape, size, color, defect, damage and location of objects)
- **Precise sorting** by air jets or mechanical fingers
- Product **specific equipment design** often including multiple technologies to maximize sorting efficiency

ADOPTION OF SENSOR-BASED SORTING AT DIFFERENT MATURITY LEVELS

* In certain mining sub-segments, such as industrial minerals and diamonds, sensor-based sorting is a more mature technology

A COMMON SENSOR BASED TECHNOLOGY PORTFOLIO

- ELECTROMAGNETIC SENSOR (EM)**
Electro-magnetic properties like conductivity and permeability
- LED SPECTROMETRY (LED)**
Color and spectral properties based on multiple LED light sources in very high optical resolution
- NEAR-INFRARED SPECTROSCOPY (NIR)**
Specific and unique spectral properties of reflected light in the near-infrared spectrum
- VISIBLE LIGHT SPECTROMETRY (VIS)**
Specific and unique spectral properties of reflected light in the visible spectrum
- X-RAY TRANSMISSION (XRT)**
Atomic density irrespective of surface properties and thickness
- LASER INDUCED BREAKDOWN SPECTROSCOPY (LIBS)**
Elemental composition
- X-RAY FLUORESCENCE (XRF)**
Elemental composition
- INFRARED TRANSMISSION (IRT)**
Density and shape properties by light absorption
- IR CAMERA (IR)**
Heat conductivity and heat dissipation
- COLOR CAMERA (COLOR)**
Color properties measured in very high optical resolution
- LASER REFLECTION/FLUORESCENCE (LASER)**
Structural, elemental and biological properties by reflection, absorption and fluorescence of laser light

OUR PRODUCTS IS SERVING A WIDE RANGE OF DETECTION PARAMETERS

Color

Removal of discolorations in mono- and mixed-color material

Shape & Size

Sort on length, width, diameter, area, broken-piece recognition, ...

Blemishes

Objects with spots or other (small) blemishes are removed

Biometric Characteristics

Sort based on water content and removal of micotoxyn contaminations

Defects

Removal of visible and invisible small and substantial defects

Foreign Material

Removal of foreign material in a material stream, e.g. insects, worms, snails or plastics in food applications

Structure

Removal of soft, molded or rotten food

Fluo

Based on the chlorophyll level present in produce defects are removed

Density

Detection of density differences

X-RAY

Analysis of objects based on their density and shape

Damage

Broken, split and damaged objects are detected and removed

Detox

Removal of produce contaminated with aflatoxin

 Visible

 Invisible

 Both

EXAMPLES OF CROSS UTILIZATION OF OUR PORTFOLIO TECHNOLOGIES

TITECH NIR + ODENBERG platform

Field Potato Sorter

- The NIR technology allows efficient removal of rocks, dirt and rotten potatoes before the potatoes are stored
- The solution opens up sorting of unwashed potatoes in a way that previously was not possible

BEST LASER + TOMRA mining platform

PRO Laser Duo

- The LASER technology allows detection of quartz of all colors. This opens for sorting of quartz itself, and gold bearing quartz mineralization
- The solution is unique in the market and further underlines our technological leadership

TITECH NIR + BEST LASER

Nimbis BSI

- An NIR sensor has been added to the NIMBUS machine platform
- The new machine increases our competitiveness in the nuts segment

Several more projects on combining technologies into new products in the pipeline

SORTING UNWASHED POTATOES: WORKING PRINCIPLE

The product is spread uniformly onto the infeed belt and will be scanned by cameras in the different inspection zones. A few milliseconds later one type of material will be rejected by intelligent finger ejectors, positioned at the end of the conveyor belt, while the good products continue their way along the sorting line.

- A** Infeed (unsorted)
- B** Full width NIR and Color Vision sensors
- C** Intelligent finger ejectors
- D** Gentle handling conveyer chutes (optional)

DEFECTS & BLEMISHES REPORTING

Dirt Clod

Rot

Stones

Golf Ball

Reports can be generated with the following data:

Product Data

- + Average Length & Width mm(ins)
- + Length and Width distribution (size bins) mm(ins)
- + Total potato count #
- + Total reject count #
- + Stone, soil clod, rot, other %

Sorter Operation Data

- + Belt speed, average belt fill %
- + Object counts/second
- + Program running

- The Field Potato Sorter is ODENBERG's first venture into the **unwashed potato market**
- The machine uses unique near **infra-red technology** to remove soil clods, stones and rotten potatoes, in addition to the foreign material commonly found in fields such as golf balls, plastics, wood etc
- The FPS sorter should be used after a soil remover and is designed to fit existing grading equipment or be used as a standalone unit and can operate on harvested potato crop before and after storage
- The system also provides online potato size data for logging, plus sorter operating information

MARKET SIZE AND POTENTIAL

Total annual market size

EUR million

Market growth

- Market expected to grow at rate of around 7-9% per year
- A large part of growth from unlocking of dormant potential – only possible by developing new applications and technologies
- Some growth in “old world”, but faster growth in “new world”

Source: TOMRA estimates and analysis

* Market size for food includes peeling, meat/process analytics, virgin materials and tobacco.

BACKLOG DEVELOPMENT AND MOMENTUM

ORDER INTAKE

ORDER BACKLOG

REVENUES

- Tomra Sorting Solutions (TSS):
 - Delivered all time high order intake of 1,188 MNOK in the quarter, compared to 826 MNOK same quarter last year
 - Revenues came in at 820 MNOK (up from 687 MNOK in 1Q17)
 - With an all time high order intake, and somewhat limited number of orders taken to P/L, the quarter ends with an all time high order backlog of 1,515 MNOK
- Estimated backlog conversion ratio in 2Q18: 70%*

YIELD INTO USAGE

GROWTH IN GLOBAL FOOD DEMAND WILL SPUR INVESTMENTS IN AUTOMATION

Drivers and trends

- **Increasing food consumption in emerging markets**, more mid-class consumers
- Industry focus on **increased productivity** and **reducing costs** through automation & quality control
- **Higher quality demands** from the consumers
- **Stricter regulations** from governments concerning **food safety , health & traceability**
- Shift towards packaged **convenience food and fast food**
- **Risk of claims & recalls**
 - Social media snowball effect (Twitter, Facebook, etc.)
- Globalization of brands and sourcing set up
- Scarcity & expense of (seasonal) **manual labor**
- Consolidation in the retail and processing sectors
- Adoption of technology in emerging markets

MARKET SIZE FOOD SORTING*

Total annual market size

EUR million

Market growth

- Total market for food sorting growing around 6-8% per year
- Approximately a third of total growth is dormant potential
 - only unlocked by development of new applications and technologies
- New world share grows but the two old world champions (Europe & Americas) remain strong

Expected development in geographical revenue contribution

* Market sizes shown include peeling, meat/process analytics, virgin materials and tobacco.

WE ARE UNIQUELY POSITIONED TO SERVE THE ENTIRE VALUE CHAIN WITH OUR PRODUCT PLATFORM

Sales of potato-related products account for about 25% of the sales in food bulk sorting

TOMRA HAS ESTABLISHED THE BROADEST FOOTPRINT WITHIN FOOD SORTING

THREE WAYS OF SORTING WITHIN THE FOOD SEGMENT

Free fall (Channel / Chute)

Application	Seeds, rice, grains
Companies	Buhler, Key, Best , Satake, Daewon, Hefei, Orange
Sensor tech.	Camera (simple)

Belt

Application	Prepared /preserved veg. and fruit
Companies	Best , Key, Odenberg , Raytec
Sensor tech.	Several (complex)

Lane

Application	Fresh produce
Companies	MAF, Aweta, Greefa, Compac
Sensor tech.	Several (medium)

Note: Piechart showing estimated total revenue within the food sorting segment

Introduction

- Compac is a New Zealand-based provider of post-harvest solutions and services to the global fresh produce industry
- Founded in 1984 by Hamish Kennedy with HQ in Auckland NZ and has around 500 employees
- Compac has a leading position within sorting of apples, kiwifruit, cherries, citrus, stonefruit, avocados and tomatoes
- The company designs, manufactures, sells and services packhouse automation systems that sort produce based on their weight, size, shape, colour, surface blemishes and internal quality
- Fruit handling equipment singulates fruits into lanes, in-feeds (wash and wax), inspects, sorts/grades and partly packages

Spectrim: Compac's latest sorter

- The sorter was launched in 2015
- Represents an unmatched capability of external defect detection and an advanced 3D imaging and modelling
- For sorting of apples, citrus, stone fruit and kiwi fruit
- Uniform lighting that minimizes shadows and reflections
- Sensors and cameras generate up to 500 images of every piece of produce, creating an accurate 3D model of each fruit
- Three different wavelengths that can be configured to target specific defects: color, blemishes, bruising

Key Financials (NZDm)¹

ACQUISITION OF BBC TECHNOLOGIES

The natural add-on to Compac

- TOMRA acquired BBC Technologies 26th February 2018
- BBC Technologies is headquartered in Hamilton, New Zealand and is a leading provider of precision grading systems for blueberries and other small fruits
- 145 employees across locations in New Zealand, Chile, Europe and USA
- The company complements TOMRA's own fruit inspection and grading technology portfolio. It also adds an innovative unique quality tracking system: www.freshtracker.com
- The majority of BBC Technologies sales have been in the blueberry segment, but the company also offers solutions for cherries, cherry tomatoes and other small soft fruits
- BBC is a market leader with the new platform (KATO)
- Berries are a very attractive segment, as they represent high value, but are very delicate to handle

Deal details:

- Purchase price of 363 MNOK / 64 MNZD, free of cash and interest-bearing debt.
- Closing 1 March 2018
- Acquisition settled in cash, financed through existing drawing rights
- FY17: 36 MNZD in revenues / 8 MNZD EBIT

AND AGAIN**

GLOBAL DRIVERS FOR THE RECYCLING SEGMENT

Drivers and trends

- **Consumption and industry production level increase**
- Favorable changes in **regulatory framework** (DSD, WEEE, ELV, etc)
- **Commodity price levels and fluctuation**
- **Access to financing**
- **Demand** for recycled **raw materials**
- Increasing **labor costs** in emerging world drive adoption of automatic sorting technologies
- Some countries in Western Europe partly saturated
- Pre-sorted (plastics) still door opener in new markets
- Municipal Solid Waste (MSW) important in emerging countries
- More aggressive pricing from competitors affect market

ONLY A FRACTION OF THE WASTE VOLUME IS HANDLED BY SENSOR BASED SORTING

Sensor based sorting is competing with different technologies

Landfill

Incineration

Separate Collection

Scavengers

Hand Sorting

LEGISLATIVE FRAMEWORK - PROMOTING RECYCLING

	Description	Target	
Packaging Directive	- Rules on the production, marketing, use, recycling and refilling of containers of liquids for human consumption and on the disposal of used containers 2014 review included new targets 2015 revision includes lightweight plastic carrier bags	- Recycling and reuse of municipal waste: 70% by 2030 - Recycling and reuse of packaging waste: 80% by 2030 - Phasing out landfilling by 2025 of recyclable waste in non hazardous landfills	
Waste Electrical and Electronic Equipment (WEEE) Directive	- Collection, recycling and recovery targets for all types of electrical goods 10 categories: Large household appliances, Small household appliances, IT and telco equipment, Consumer equipment, Lighting equipment, Electrical and electronic tools, Toys, Leisure and sports equipment, Medical devices, Monitoring and control instruments, Automatic dispensers	The overall aim is for the EU to recycle at least 85% of electrical and electronics waste equipment by 2016	
Landfill Directive	- The objective of the Directive is to prevent or reduce as far as possible negative effects on the environment - In particular: surface water, groundwater, soil, air, and on human health from the landfilling of waste by introducing stringent technical requirements for waste and landfills.	Amount of biodegradable municipal waste reduced to 50% in 2009 and to 35% in 2016 (compared to 1995 levels)	
End of Life Vehicle (ELV) Directive	- Aims at reduction of waste arising from end-of-life vehicles - The scope of the directive is limited to passenger cars and light commercial vehicles	- Reuse and recycling: 85% - Reuse and recovery: 95%

MARKET SIZE RECYCLING

Total annual market size

EUR million

Market growth

- Market expected to grow at around 7-9% per year, lower than previous expectations due to economic slowdown
- Demand in old world flattening, while new markets expected to drive growth
- Existing segments will serve as a base, whilst the majority of growth will come from:
 - New geographies
 - New applications
 - New products

RECYCLING: APPLICATIONS AND SENSOR TECHNOLOGY

MUNICIPAL SOLID WASTE

Hard plastics, plastic film, mixed paper, RDF, metals, organics/biomass

NIR, VIS, XRT, LASER

RECYCLING COMPETITIVE LANDSCAPE

TOMRA competitive positioning

- Largest installed base
- Highest revenues
- Broadest technology platform
- Highest number of applications and markets served
- Leading brand
- **Market share: 55-65%**

Source: TOMRA estimates and analysis

A close-up photograph of two hands held palm-up, displaying two different types of mineral samples. The left hand holds a pile of dark, reddish-brown, irregularly shaped mineral fragments. The right hand holds a pile of lighter, yellowish-white, more crystalline mineral fragments. The background is blurred, showing a person in a white shirt with blue lettering.

**SOURCE
INTO 
RESOURCE**

GLOBAL DRIVERS FOR THE MINING SEGMENT

- **Energy costs** and **water stress** are major drivers
- **Demand of all commodities** is expected to grow with increased population and urbanization in the drivers seat
- **Increasing labor costs** in emerging world drive adoption of automatic sorting technologies
- **Mining companies capex** impact the investment sentiment
- Sensor based sorting is considered to be a future solution
 - Hardest competition comes from alternative well proven technologies

MARKET SIZE MINING

Total annual market size

EUR million

Market growth

- Capex has declined recent years
- Sensor based machines sales expected to grow at around 15% per year
 - Growth is however conditional on new applications and technologies being developed
- Sensor based sorting is still a technology to be accepted and growth in this niche has been limited in recent years

MINING: APPLICATIONS AND SENSOR TECHNOLOGY

INDUSTRIAL MINERALS

XRT, EM

THE CONCEPT OF SENSOR-BASED SORTING IN MINING

Mining process: Industrial minerals

- 15% to 50% of the ROM can be rejected in an early stage of the process (application dependent)
- These low grade waste rocks don't need to be transported, crushed, grinded or further treated

Current segment

Mining process: Metal mining

Potential new segment

MINING COMPETITIVE LANDSCAPE

TOMRA competitive positioning

- Wide geographical coverage
- Broadest technology platform
- Leading brand
- **Market share: 40-50%**

Disclaimer

This Document (which may be a presentation, video, brochure or other material), hereafter called Document, may include and be based on, inter alia, forward-looking information and statements that are subject to risks and uncertainties that could cause actual results to differ. The content of this Document may be based on current expectations, estimates and projections about global economic conditions, including the economic conditions of the regions and industries that are major markets for TOMRA Systems ASA and its subsidiaries and affiliates. These expectations, estimates and projections are generally identifiable by statements containing words such as “expects”, “believes”, “estimates” or similar expressions, if not part of what could be clearly characterized as a demonstration case. Important factors that could cause actual results to differ materially from those expectations include, among others, changes in economic and market conditions in the geographic areas and industries that are or will be major markets for TOMRA Systems ASA. Although TOMRA Systems ASA believes that its expectations and the Document are based upon reasonable assumptions, it can give no assurance that those expectations will be achieved or that the actual results will be as set out in the Document. TOMRA Systems ASA does not guarantee the accuracy, reliability or completeness of the Document, and TOMRA Systems ASA (including its directors, officers and employees) accepts no liability whatsoever for any direct or consequential loss arising from the use of this Document or its contents. TOMRA Systems ASA consists of many legally independent entities, constituting their own separate identities. TOMRA is used as the common brand or trade mark for most of these entities. In this Document we may sometimes use “TOMRA”, “TOMRA Systems”, “we” or “us” when we refer to TOMRA Systems ASA companies in general or where no useful purpose is served by identifying any particular TOMRA Company
