

INVESTOR PRESENTATION

We live in an age with the
highest level of consumption
our planet has ever seen

Using more resources than ever
before. More than our planet can
continue to sustain.

TOMRA IS WELL-POSITIONED TOWARDS MEGATRENDS

1 Solutions for optimal resource productivity

3 Pioneer in application of sensor-based technology

2 Leading market position – fit for growth

Revenues

EBITA and margin

DID YOU KNOW?

- By 2025 **solid waste generation** will **increase by 70%** compared to 2010 levels
- **32%** of all plastic packaging made **ends up in nature** every year
- **20%** of plastic packaging could be **profitably re-used** and **50%** could be **profitably recycled** if designed for after use systems
- Continuing current practices there will be **more plastic than fish** in the ocean by 2050

Only 2% of the planet's annual plastic packaging production is reused for the same/similar products

SIGNIFICANT UNTAPPED POTENTIAL TO REUSE GOOD MATERIALS

PLASTIC PACKAGING

**VALUE
PROPOSITION***
\$ 50–80 BN

Total volume of plastic packaging is 78 mln tonne annually whereof ~14% is currently recycled, meaning ~67 mln tonne lost. With a volume yield of 72% and a weighted average price of 1,100–1,600 USD/t, the total value proposition is in the range of USD 50-80 bn. Please note that this is a conservative estimate based on a narrow definition of total annual plastic packaging volume. Applying a wider definition can increase the value proposition up to USD 170-190 bn.

STEEL

**VALUE
PROPOSITION***
\$ 70–150 BN

Worldwide steel production is currently about 1,600 mln tonne annually. 70-90% recycling means ~1,100-1,450 mln tonne recycled and 160-480 mln tonne lost. Assuming ~90% yield in process with market price of ~500 USD/t equals USD 70-220 bn, so conservative range USD 70-150 bn

PAPER

**VALUE
PROPOSITION***
\$ 30–40 BN

~80 % of produced paper is potentially recyclable, ~400 mln tonne annually x 80% = 320 mln t/a potentially recyclable paper in the market. Today, ~58 % or 230 mln t/a are recycled, means 90 mln tonnes are lost. If this is recovered and goes into the paper recycling process there will be between 10-30% fibre loss, assuming on average 20%. The value of newsprint paper is ~400-600 USD/t, let's assume 500 USD/t = ~90 mln t/a x 80% x 500 USD/t = USD36 bn

CIRCULAR ECONOMY – REDEFINING VALUE CREATION

THE CIRCULAR ECONOMY AND THE TOMRA CLOSED LOOP

TOMRA's solutions enable a more predictable offtake of high quality recycled materials for same purpose use: Creating the market

DID YOU KNOW?

- By 2050, a global population of **9.8 billion will require 70%** more food than is consumed today
- We are currently **wasting 33%** of global food production
- The food industry accounts for around **10% of global GDP**
- Agriculture accounts for **20%** of **global greenhouse gas emissions**

NEW WAYS OF FEEDING A FAST GROWING DEMANDING POPULATION...

To ensure an efficient food production there is an increased need to...

Feeding a demanding, rapidly growing urbanized population brings opportunities for TOMRA

The digital consumer...

Increased buying power from a growing and wealthier middle-class...

FOOD VALUE CHAIN IS GETTING MORE COMPLEX AND DRIVES THE FOOD MARKET TOWARDS NEW SOLUTIONS

TOMRA TO PLAY A DIFFERENCE IN THE FUTURE OF FOOD PRODUCTION

OUR BIGGEST GLOBAL CHALLENGES = OUR BUSINESS OPPORTUNITIES

MAKING MEANINGFUL CONTRIBUTION ALONG THE WAY

Thematic Support: Future of Food & Circular Economy

TOMRA's mission is to create sensor-based solutions for optimal resource productivity,
making sustainability profitable
– with increased relevance and meaning

The TOMRA Operations

TOMRA's Corporate Responsibility Program will support the vision of leading the resource revolution,
through the impact of our people, products & services

Tangible actions to demonstrate our purpose of business

FROM PURPOSE INTO PROFITS AND
PROFITS INTO PROGRESS, TOMRA IS
TRANSFORMING WHAT IT MEANS
TO BE RESOURCEFUL.

- Our solutions, in use around the globe, helped keep **~25 millions of tons of CO₂** from being released into the atmosphere in 2018
- **~35 bn used beverage containers are captured every year** through our reverse vending machines
- Our steam peelers process **~15 million tons of potatoes per year with a 1% yield improvement** over other alternatives
- **~715,000 tons of metal are recovered** every year by our metal-recycling machines

RETURNS INTO VALUE

DID YOU KNOW?

- **1 million** plastic bottles are bought around the world every minute
- **Less than half** of all purchased plastic bottles are collected for recycling
- **~ 35bn** beverage containers are **captured by TOMRA** every year...
- ...representing only **2.5%** of all beverage containers sold in 2017

INCREASING PUBLIC PRESSURE TO REDUCE WASTE AND LITTERING

AN OVERVIEW OF CURRENT DEPOSIT MARKETS*

* In addition, some markets have refillable deposit systems such as: Austria, Belgium, Chile, Czech Republic, France, Hungary, Poland and South Korea

UPCOMING DEPOSIT MARKETS ON THE MOVE

— Recently approved
— In progress

North America:
Possible expansion of existing deposit systems

Scotland:
Commitment to a Container Deposit Scheme announced in party program

England:
Announced plans for a deposit scheme to reduce plastic pollution. Ongoing consultation

Australia:
NSW introduced deposit from December 2017
QLD introduced deposit from November 2018
Western Australia might introduce in 2020

EU Single-Use Plastic Directive:
Targets on recycled content and collection target for plastic bottles. Deposit scheme mentioned as a mean to reach those targets.

A PROVEN SOLUTION TO ACHIEVE HIGH RETURN RATES

Return rate and deposit value* for various container deposit schemes

Return rates in Lithuania

*Deposit values converted to EUR for comparison purpose

**Norway increased its deposit value to 0.21-0.31EUR since 01.09.2018

DESIGNING A DEPOSIT SCHEME – LENGTHY PROCESS FROM IDEA TO LAW

Many stakeholders around the table

Illustrative legislation process

Many questions to address:

- Types of material and product included
- Measurement of success and effectiveness
- Deposit value
- Participants and their role
- Financing of the scheme
- Deployment of infrastructure and logistics
- Fraud prevention
- System regulation and monitoring

TOMRA SORTING SOLUTIONS

STRONG REVENUE GROWTH SINCE INCEPTION IN 1996

Revenue development and key milestones MNOK

- Total revenue growth (organic plus inorganic) CAGR of ~30% per year from 2004-2018
 - Average annual organic growth for the same period was ~16%
- Technology base and segment/application knowledge expanded both through acquisitions and in-house ventures

HOW DOES SENSOR BASED SEPARATION WORK?

ADOPTION OF SENSOR-BASED SORTING AT DIFFERENT MATURITY LEVELS

* In certain mining sub-segments, such as industrial minerals and diamonds, sensor-based sorting is a more mature technology

A COMMON SENSOR-BASED TECHNOLOGY PORTFOLIO

- ELECTROMAGNETIC SENSOR (EM)**
Electro-magnetic properties like conductivity and permeability
- LED SPECTOMETRY (LED)**
Color and spectral properties based on multiple LED light sources in very high optical resolution
- NEAR-INFRARED SPECTROSCOPY (NIR)**
Specific and unique spectral properties of reflected light in the near-infrared spectrum
- VISIBLE LIGHT SPECTROMETRY (VIS)**
Specific and unique spectral properties of reflected light in the visible spectrum
- X-RAY TRANSMISSION (XRT)**
Atomic density irrespective of surface properties and thickness
- LASER INDUCED BREAKDOWN SPECTROSCOPY (LIBS)**
Elemental composition
- X-RAY FLUORESCENCE (XRF)**
Elemental composition
- INFRARED TRANSMISSION (IRT)**
Density and shape properties by light absorption
- IR CAMERA (IR)**
Heat conductivity and heat dissipation
- COLOR CAMERA (COLOR)**
Color properties measured in very high optical resolution
- LASER REFLECTION/FLUORESCENCE (LASER)**
Structural, elemental and biological properties by reflection, absorption and fluorescence of laser light

OUR PRODUCTS ARE DETECTING A WIDE RANGE OF PARAMETERS

Color

Removal of discolorations in mono- and mixed-color material

Blemishes

Objects with spots or other (small) blemishes are removed

Defects

Removal of visible and invisible small and substantial defects

Structure

Removal of soft, molded or rotten food

Density

Detection of density differences

Damage

Broken, split and damaged objects are detected and removed

Shape & Size

Sort on length, width, diameter, area, broken-piece recognition, ...

Biometric Characteristics

Sort based on water content and removal of micotoxyn contaminations

Foreign Material

Removal of foreign material in a material stream, e.g. insects, worms, snails or plastics in food applications

Fluo

Based on the chlorophyll level present in produce defects are removed

X-RAY

Analysis of objects based on their density and shape

Detox

Removal of produce contaminated with aflatoxin

EXAMPLES OF CROSS UTILIZATION OF OUR SENSOR TECHNOLOGIES

TITECH NIR + ODENBERG platform

Field Potato Sorter

- The NIR technology allows efficient removal of rocks, dirt and rotten potatoes before the potatoes are stored
- The solution opens up sorting of unwashed potatoes in a way that previously was not possible

BEST LASER + TOMRA mining platform

PRO Laser Duo

- The LASER technology allows detection of quartz of all colors. This opens for sorting of quartz itself, and gold bearing quartz mineralization
- The solution is unique in the market and further underlines our technological leadership

TITECH NIR + BEST LASER

Nimbus BSI

- An NIR sensor has been added to the NIMBUS machine platform
- The new machine increases our competitiveness in the nuts segment

Several more projects on combining technologies into new products in the pipeline

THE BENEFITS OF BEING TOMRA SORTING

Our position: A solid platform for further growth

ENTERING NEW MARKETS THROUGH MID-MARKET STRATEGY

Creating competitive offering to fast growing mid-market

DEVELOPMENT IN ORDER INTAKE AND ORDER BACKLOG

ORDER INTAKE

ORDER BACKLOG

REVENUES

- TOMRA Sorting Solutions (TSS):
 - Revenues of 1,326 MNOK, up from 1,046 MNOK last year
 - Order intake of 1,146 MNOK in the quarter, compared to 967 MNOK last year
 - Despite all time high revenues in the quarter, a strong order intake led to healthy order backlog of 1,399 MNOK by the end of fourth quarter
- Estimated backlog conversion ratio in 1Q19: 75%*

FOOD FOR THOUGHT

- By 2050 we will be close to **10bn** people
- We will need more food in the next 40 years than **all the harvests in history combined**
- But **farmland is constant** – at best
- The food you eat will have **travelled more than you have**

**YIELD
INTO 
USAGE**

RESOURCES ARE FINITE

- **Today:** we are paying to get rid of our waste through landfill fees and incineration
- We are wasting perfectly good materials that can be reused
- **Tomorrow:** The Circular Economy is a driver for change
- Creating **value out of waste**
- That is what the **Circular Economy** is all about

**WASTE
INTO 
VALUE**

THE CIRCULAR ECONOMY DRIVES A LEGISLATIVE PUSH...

Continued ambitious EU regulations and recycling targets:
Attracts capital and drives investments

“A common EU target for recycling 70% of packaging waste by 2030”

The Strategy also highlights the need for specific measures, possibly a legislative instrument, to reduce the impact of single-use plastics, particularly in our seas and oceans

From Green Fence to National Sword: **Short-term demand for recycling solutions in waste exporting countries**

- Limits the import of contaminated recyclable commodities and increases inspections of recyclable commodity imports
- Purity level set to 99.5%

...PROMOTING RECYCLING

2018 CIRCULAR ECONOMY PACKAGE

Description

Targets and measures

Waste Framework Directive	Rules on how waste should be managed in the EU. It provides general principles for doing so, such as the Waste Hierarchy, Polluter Pays Principle and Extended Producer Responsibility.	- A common EU target for recycling 60% of municipal waste by 2030 - A common EU target for recycling 70% of packaging waste by 2030 - A binding landfill target to reduce landfill to maximum of 10% of municipal waste by 2030 - Separate collection of textiles and hazardous waste by 2025 - Simplified and improved definitions and harmonized calculation methods for recycling rates - Concrete measures to promote re-use and stimulate industrial symbiosis - Economic incentives for producers to put greener products on the market and support recovery and recycling schemes
Packaging and Packaging Waste Directive	- Rules on the production, marketing, use, recycling and refilling of containers of liquids for human consumption and on the disposal of used containers 2015 revision includes lightweight plastic carrier bags	
Waste Electrical and Electronic Equipment (WEEE) Directive	- Collection, recycling and recovery targets for all types of electrical goods 10 categories: Large household appliances, Small household appliances, IT and telco equipment, Consumer equipment, Lighting equipment, Electrical and electronic tools, Toys, Leisure and sports equipment, Medical devices, Monitoring and control instruments, Automatic dispensers	
Landfill Directive	- The objective of the Directive is to prevent or reduce as far as possible negative effects on the environment from the landfilling of waste - In particular: impact on surface water, groundwater, soil, air, and on human health by introducing stringent technical requirements for waste and landfills.	
End of Life Vehicle (ELV) Directive	- Aims at reduction of waste arising from end-of-life vehicles - The scope of the directive is limited to passenger cars and light commercial vehicles	

...and a market pull

100% reusable, recyclable or
compostable **plastic packaging**
by 2025

Follow their lead

Disclaimer

This Document (which may be a presentation, video, brochure or other material), hereafter called Document, may include and be based on, inter alia, forward-looking information and statements that are subject to risks and uncertainties that could cause actual results to differ. The content of this Document may be based on current expectations, estimates and projections about global economic conditions, including the economic conditions of the regions and industries that are major markets for TOMRA Systems ASA and its subsidiaries and affiliates. These expectations, estimates and projections are generally identifiable by statements containing words such as “expects”, “believes”, “estimates” or similar expressions, if not part of what could be clearly characterized as a demonstration case. Important factors that could cause actual results to differ materially from those expectations include, among others, changes in economic and market conditions in the geographic areas and industries that are or will be major markets for TOMRA Systems ASA. Although TOMRA Systems ASA believes that its expectations and the Document are based upon reasonable assumptions, it can give no assurance that those expectations will be achieved or that the actual results will be as set out in the Document. TOMRA Systems ASA does not guarantee the accuracy, reliability or completeness of the Document, and TOMRA Systems ASA (including its directors, officers and employees) accepts no liability whatsoever for any direct or consequential loss arising from the use of this Document or its contents. TOMRA Systems ASA consists of many legally independent entities, constituting their own separate identities. TOMRA is used as the common brand or trade mark for most of these entities. In this Document we may sometimes use “TOMRA”, “TOMRA Systems”, “we” or “us” when we refer to TOMRA Systems ASA companies in general or where no useful purpose is served by identifying any particular TOMRA Company
